

Our mission is quite simple...  
To offer reliable, high-quality IT service  
to our customers

## Leave IT to us

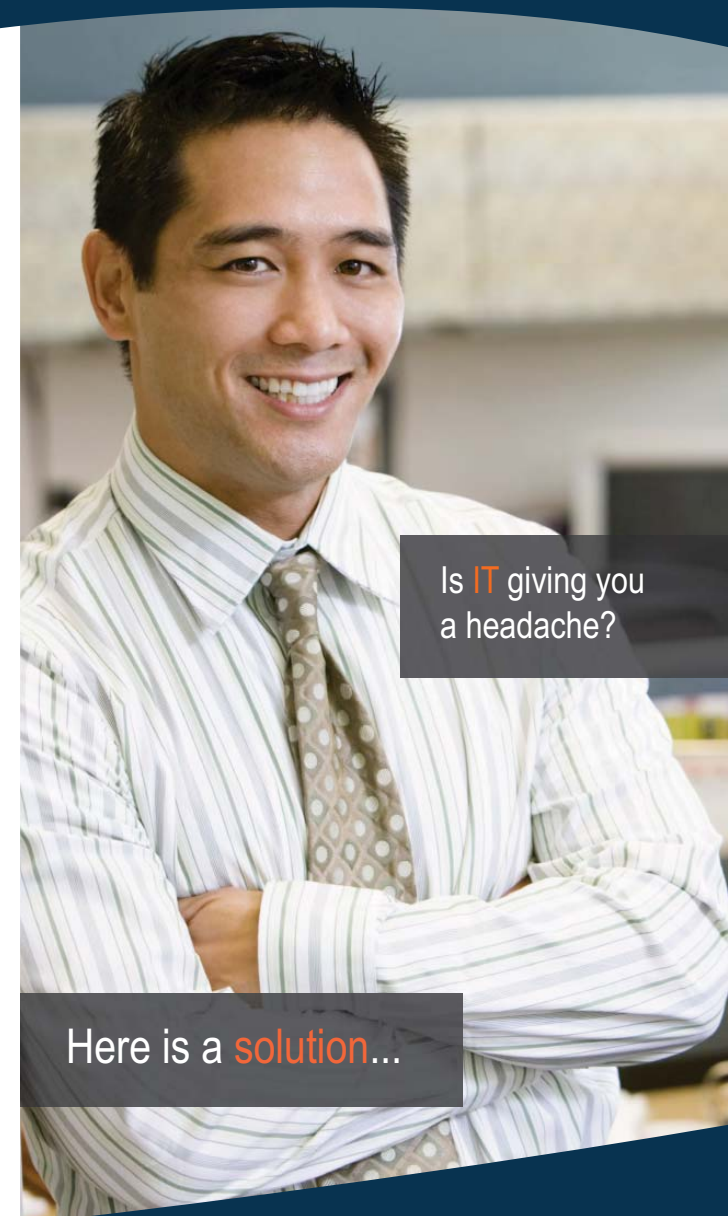

**MidTech Software Solutions, Inc.** is an Information Technology (IT) service provider specialized in IT platform and eBusiness application. MidTech has been serving various businesses and organizations in Northern California since 1997. By committing ourselves to complete client satisfaction, we have earned an excellent reputation for reliable service and performance. Our key technical areas are IT development and support, infrastructure optimization, application consolidation, and cloud-based computing solutions. We are your bridge to new technologies. We take you from the present to the future.

Is IT giving you  
a headache?

Here is a **solution**...

Having a quality IT team by your side can really *make a difference*

## Our Services

### IT Support

MidTech has a unique managed IT service model that combines onshore and offshore engineers to provide cost effective infrastructure and application supports in:

- Network management, implementation, and environment monitoring
- Business application maintenance and support

### IT infrastructure Optimization

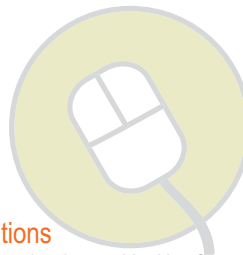

Our infrastructure team specializes in:

- Designing, configuring, and setting up security networks
- Creating data storage, backup, and disaster recovery solutions
- Installing servers and networks from the ground up

### Custom IT Application

We design and build custom applications using robust data management platforms and the latest technology to meet your specific functional requirements.

## Our Focus

### Enterprise eBusiness Solutions

Leveraging the latest Microsoft technology with .Net framework, SQL Server, and SharePoint, MidTech offers cost effective delivery models for your eBusiness solutions that include:

- Intranet and collaboration portal
- Document and record management
- Internet, eCommerce, and content management
- ERP and legacy system integration

### Green IT

We help clients optimize efficiency and reduce corporate energy consumption by implementing:

- Server virtualization
- Storage optimization
- Application consolidation

### Health IT

We provide Turn-Key HIT Solution on two platforms – client-server in your office and cloud base from the data center. Our Health Web Application includes:

- e-Registration
- e-Scheduling
- e-LabCenter
- e-Prescription

## Our Edge

### Why MidTech?

- **Higher Standard:** A Microsoft Gold Certified Partner with top talents in key technologies
- **Better Quality:** A track record of on-budget, on-time delivery
- **Greater Expertise:** A decade of business knowledge and technical experience
- **Lower Cost:** A productive team that accomplishes more for less, with efficiency and flexibility
